

PRODUCTION OF BACTERIOPHAGE COMPOSITIONS FOR USE IN PHAGE THERAPY

Abstract of the Disclosure

The present invention relates to the use of bacteriophages to treat ~~infections~~infectious diseases. The invention provides a method for intermediate to large scale commercial production of bacteriophage ~~composition~~compositions, wherein the method reduces the production volume and elevates production yield. The invention further relates to improved bacteriophage compositions comprising specific sugars that reduce or abolish the bacterial phage-neutralizing activity.
